

STROBE Statement — checklist of items for cohort studies

Neoadjuvant Chemotherapy with Trastuzumab plus Pertuzumab versus Trastuzumab

Alone in Early HER2-Positive Breast Cancer: A Single-Center Retrospective Cohort Study

SYNTHETIC DATA FOR TEACHING — NOT A REAL STUDY. Patients, investigators and institution are fictional.

This demonstration manuscript was written by AI (Claude Opus 5.5). In a real submission, the text must be written by the authors.

Item	Recommendation	Reported in	Page
1a	Title and abstract: design indicated	Abstract	1
1b	Title and abstract: informative summary	Abstract	1
2	Background/rationale	Introduction	3
3	Objectives	Introduction	3
4	Study design	Study Design and Data Sources	3
5	Setting (locations, dates of recruitment and follow-up)	Patients	3
6a	Participants: eligibility criteria, sources and methods of selection, follow-up	Patients	3
7	Variables: outcomes, exposures, confounders	Treatment Groups and Outcomes	4
8	Data sources/measurement	Study Design and Data Sources	3
9	Bias	Statistical Analysis	4
10	Study size	Patients	3
11	Quantitative variables	Statistical Analysis	4
12a-e	Statistical methods, subgroups, missing data, loss to follow-up, sensitivity analyses	Statistical Analysis	4
13	Participants: numbers at each stage, reasons for non-participation, flow diagram	Patients	6
14	Descriptive data, missing data, follow-up time	Patients	6
15	Outcome data	Pathologic Complete Response	6
16	Main results: adjusted estimates with precision	Pathologic Complete Response	6
17	Other analyses: subgroups, interactions, sensitivity analyses	Sensitivity and Subgroup Analyses	7
18	Key results	Discussion	8
19	Limitations	Discussion	8

Item	Recommendation	Reported in	Page
20	Interpretation	Discussion	8
21	Generalisability	Discussion	8
22	Funding	Title page (Source(s) of support)	title page

Page numbers refer to the blinded article file. Item wording is abbreviated; see

<https://www.strobe-statement.org/checklists/> for the full checklist (von Elm E, et al. Lancet 2007;370:1453-7).
